REFRIGERATORS

29th July 2022

IMPORT PRICING UPDATE

Although this is definitely not something we wanted to have to do, we have had no choice but to review our current price list.

Our supply chain, through various well publicised factors, is under continuing strain and we are seeing costs rising across almost all our component and materials suppliers. On a significant number of items, this is literally monthly at the moment. Increases in energy and transport costs are also having a serious effect.

We have taken major steps to mitigate these pressures wherever possible but, unfortunately, we now have to pass some of these increases on to you, our customers. We have done our best to minimise this, and have kept the average increase to around 8.5%, although some individual models may be slightly higher.

The new price list will come into effect on September 1st 2022 and will apply to all orders placed from that date. Orders currently on our system will be invoiced at their original value. Orders placed before the end of August must be delivered and invoiced before the end of September to stay at the pre-increase level. All orders delivered on or after October 1st 2022 will be invoiced at the new September 2022 prices.

Despite having to take this measure, we believe that Osborne Refrigerators products continue to offer exceptional quality and value for money, particularly against other manufacturers of comparable quality. We look forward to working with you all in the future to make sure that your customers continue to get the best in high quality, British manufactured refrigeration.

Yours faithfully

Richard Howlett
