

OSBORNE REFRIGERATORS

The Osborne **eCold** range...
...good for your pocket and good for the planet.

Display cabinets from Osborne Refrigerators are designed to be good for your pocket as well as the environment. Low-voltage fans (where fitted) and LED lighting put almost no waste heat into the cabinet, and increased insulation and efficient compressors all maximise cooling performance while using less energy. Osborne cabinets are also designed to be virtually maintenance-free, with no fluorescent tubes to change, and most models with condensers that never require unblocking.

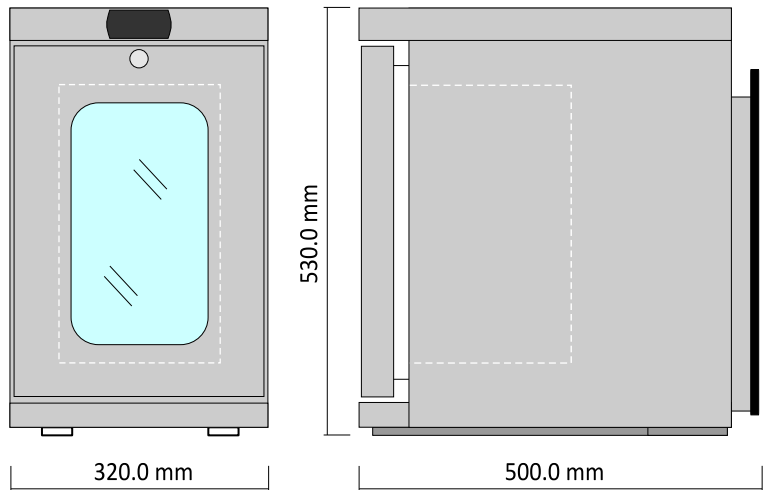

Osborne Refrigerators Ltd have been manufacturing at our Bognor Regis factory for more than 50 years and we are the leading British manufacturer of refrigerators designed for the chilling and storage of cold beverages, wine and foodstuffs. As well as our standard range of cabinets, which are specified by leading breweries, drinks manufacturers and leisure companies across the world, this also includes a range of high quality cabinets designed specifically for milk storage.

All our refrigerators use CFC free polystyrene insulation and can be efficiently recycled at the end of their life. They are also available with a choice of refrigerants.

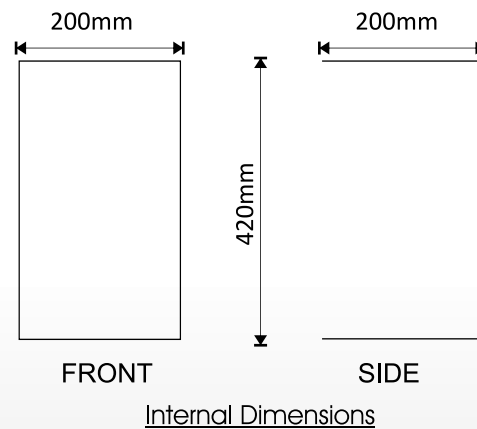

The Osborne range is always evolving, due to our commitment to constantly improve our products and also in response to specific customer requirements. We have built an enviable reputation for the quality and reliability of our refrigerators and we will never stop working to maintain that reputation.

The BD4 range of display cabinets is perfect for the promotion of wines and spirits. With a compact footprint, there is space to put one on almost any countertop and there are three versions available. The BD4C is a standard temperature cabinet, ideal for display of specialist wines or champagnes. The BD4S is a sub-zero cabinet designed to display wines and champagnes at below 0°C for an ice cold, super-refreshing drink. The BD4F is a spirit freezer designed to display vodkas and gins at below -10°C.

The BD4 is manufactured from rust resistant zinc-coated steel with a hard wearing powder-coat finish, or from brushed stainless steel, and has a stainless steel interior and a lockable glass door. The interior has cold wall cooling and the maintenance-free condenser is fan-cooled for increased efficiency. Insulation is environmentally friendly polystyrene and the refrigerant is R600a hydrocarbon. If painted, the exterior finish is either black or silver, other colours are available to special order.

BD4C / BD4S / BD4F

	BD4C	BD4S	BD4F
H (mm)	530	530	530
W (mm)	320	320	320
D (mm)	500	500	500
Nett Cap. (ltr)	13.8	13.8	13.8
Bottle Cap. (75cl bottle)	5	5	5
Temp Range (°C)	+1 to +5	-2 to -5	-10 to -15
Refrigerant	R600a	R600a	R600a

Features
Cold wall refrigeration
Maintenance-free condenser for efficient performance
LED lighting
Locking hinged door
Stainless steel interior
Options
Choice of colours
Stainless steel exterior
Stainless steel door frame only
